

# Quick start guide

O<sub>2</sub> HomeBox 6441

## Safety instructions

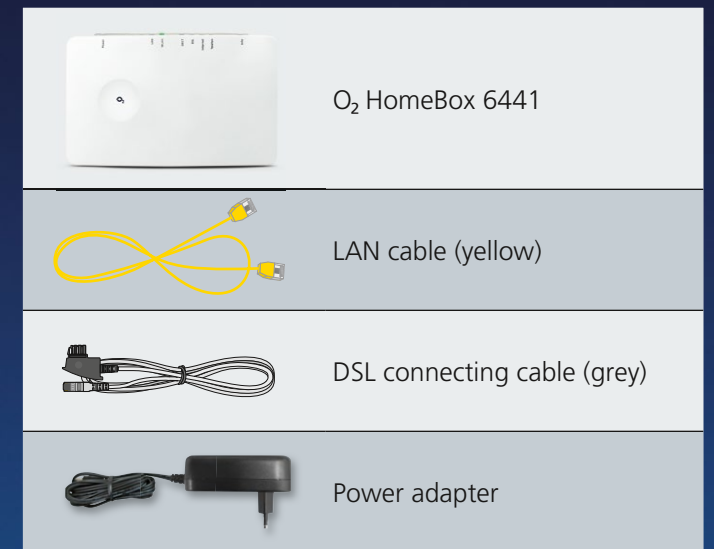

**Important:** Please read these instructions carefully before use and keep them in a safe place for future reference. Please hand this guide to any new owner of the device.

**! WARNING: The electric voltage present at mains, telephone and network cables connections is dangerous! Failure to observe the safety instructions can lead to hazardous situations which can result not only in high material or property damage, but also in severe injuries or death.**

- The device must not be opened.
- Do not install the device or connect or disconnect any line connections during a thunderstorm.
- Operation is only permitted for dry rooms within closed buildings.
- The power outlet must be located near the unit and must be easily accessible.
- Lay the cables so that no one can step on them or trip over them.
- Do not allow liquids to enter the inside of the unit, as this may cause an electric shock or a possible short circuit.
- Avoid direct sunlight.
- Before drilling, make sure that there is no building installation at the drilling point. Damage to gas, electricity, signal or water lines may result in life injuries or property damage.
- The device may only be operated with the power supply unit UH0301P-12PE.

We appreciate that you have opted for O<sub>2</sub> and hope that you will now enjoy the many benefits of your new DSL connection.

### What's in the box?

**The frequency, mode and the maximum transmitted power in EU are listed below:**

	● Flashing quickly	PIN OK; waiting for authentication

## Your O<sub>2</sub> HomeBox 6441 in detail

### Rear side

### USB connection on the side

# Install in just 3 steps – It's this easy:

## 1 Prepare the installation

Connect the enclosed DSL cable to your home telephone socket (middle socket) and connect it to the DSL socket on the O<sub>2</sub> HomeBox. Now connect the desired telephones as shown in the figure below. Then connect your O<sub>2</sub> HomeBox via the yellow LAN cable to your PC or make a WLAN connection (see below „WLAN initial setup“). Switch on the O<sub>2</sub> HomeBox.

## 2 Internet connection

Open an Internet browser via the device connected to the O<sub>2</sub> HomeBox and go to **o2.box** or **192.168.1.1**. The device wizard, which now opens automatically, helps you to configure the Internet connection as well as to unblock the connection. Further information can also be found in the manual, which can be downloaded at <http://www.astorianetworks.com/astoria/download.html>

## 3 Start surfing and make calls

Your O<sub>2</sub> HomeBox 6441 is now configured for access to the Internet and telephony. If necessary, configure the connected telephone via the phone menu. At the time of delivery, all connected telephones ring for incoming calls.

# WLAN Initial Setup

- Switch on the WLAN-function on your terminal (PC, Smartphone, Tablet etc.) and make sure that the WLAN-function is also activated on your O<sub>2</sub> HomeBox (WLAN-LED is lit). Otherwise, please activate it by pressing the button above the WLAN LED.
- Now connect your device to the O<sub>2</sub> HomeBox device: This procedure is different for different operating systems (Windows, Android, Mac OS, Linux, etc.). Please refer to your device manual.
- Select the wireless network from your O<sub>2</sub> HomeBox 6441. You will find the name of the network (SSID) and the network key (WPA2 key) on the name plate on the back of your O<sub>2</sub> HomeBox 6441.
- Click 'Connect' and enter your WLAN network key (WPA2 key).
- Alternatively, scan the QR-Code for an easy initial WLAN set-up and to create a connection.
- The WLAN connection has now been completely set up.

## Setup by WPS

WPS (Wi-Fi Protected Setup) allows you to easily and quickly connect new WLAN devices to your wireless home network. For this purpose, the terminals to be connected must support the WPS function.

- Press the WLAN button of the O<sub>2</sub> HomeBox for about 10 seconds. The WLAN LED starts to flash green, continuously.
- Now activate the WPS function on the WLAN device within 2 minutes. Observe the operating instructions for the corresponding device.
- After the WLAN connection has been successfully established, this is indicated on the WLAN device, and the WLAN LED of the O<sub>2</sub> HomeBox is lit permanently or irregularly (during data transfer).

# Cabling your O<sub>2</sub> HomeBox 6441: the connection options

Below you will find an example showing the cabling of your O<sub>2</sub> HomeBox 6441. Connect the equipment accordingly.
